Fan tail flips during presentation to imitate a natural swimming action

Lots of leg action

Its fan tail "flips" during presentation to imitate the natural swimming action of a live shrimp. In addition the tail includes a rattle chamber that not only produces fish-attracting sound, but it adds weight to the tail resulting in enhanced motion. Rig it on a Mister Twister® Saltwater Jighead and, depending on the speed of your retrieve, you will be able to fish it at virtually any depth.

The key to effective artificial shrimp presentations is tail action and sound. The Exude™ Fan Tail Shrimp not only has both, but its Exude™ formulation begins releasing scent as soon as the lure hits the water. Action, size, sound, colors and scent—Mister Twister's 2 1/2" Exude™ Fan Tail Shrimp has it all.

LSST-Luminescent/Silktreue Tail

Releases scents and stimulants like a real shrimp

Rigged on a saltwater jighead or single weedless hook, the EXUDE™ Shrimp mimics an escaping shrimp. A quick popping retrieve provides great tail action, while the undulating legs, make it irresistible to redfish, trout, snook, and flounder.
